BRUT ANTEPRIMA

The most important expression of Bersi Serlini Taste

A blend of Chardonnay and Pinot Blanc, Anteprema is a great base Franciacorta of unique freshness, from our family vineyards. We harvest the grapes dedicated to Anteprema in advance to the others to obtain harmony and ripeness.

The blend delivers fresh acidity, a sense of rugged tight-end with soft and engaging balance that makes it a great wine to drink. Anteprema is the ideal Franciacorta for all starters, from aperitif, at a reception, entrée and cocktail hour.

Anteprema Brut bears an important historical role in the history of the Bersi Serlini Winery, whose first bottle of Brut was placed on the market in 1970. The beautiful name Anteprema has been given in 2013 and for the occasion a new label was designed, with the drawing echoing the legacy of Art Nouveau style original to all early labels.

HARVEST BY HAND

Hand picked harvest normally starts in the beginning of August. Winemaking is made with respect to the identity of the Bersi Serlini Winery terroir. Anteprema has a first fermentation for minimum months in temperature regulated stainless steel fermenters tanks. After tirage, all bottles age on the lees in the wonderful underground vaulted cellars at a constant temperature of 12° throughout the whole year. Manual riddling of the duration of 5 weeks.

TASTING

Bright and clear straw yellow color with shiny white golden reflections. The sparkle is very persistent with good brilliance. Anteprema is delicate and fresh, with several notes of sour fruits wrapping the whole scent with brioche and biscuit flavours. Sour attack on the palate adds a very crisp balanced, round and fresh tone. Anteprema's finish is long with hints of its own characteristic freshness.

FOOD PAIRING

Anteprema is a perfect Franciacorta for aperitif as well as served with a first course to accompany light and delicate dishes. It may also be well paired with cheese selections. Perfectly enjoyable with everyone, exceptional in company of friends. Recommended serving temperature 8-10°.
